PROFILE

Engineering graduate with 3 years of data and BI experience at **EssilorLuxottica** (190,000 employees) on an international scope covering **3 regions** (Europe, US, Asia). I built **data pipelines** on Azure and Databricks, modeled data and delivered **30 to 40 dashboards** on **4 BI tools** (Power BI, SAP BO, Qlik, Databricks) used by business departments and management. On the group BI migration, computation times were **cut by more than 65%** on critical reports and I **trained 75 users**. I also designed and deployed to production an **AI chatbot (RAG)** that cut the teams' information search time by **30%**. Comfortable on the business side: gathering and challenging requirements, specifications, user acceptance testing and training, in French and English.

30 to 40	**−65%**	**75**	**−30%**
dashboards delivered on 4 BI tools	computation time on critical reports	users trained (60 end users · 15 key users)	information search time (AI chatbot)

TECHNICAL SKILLS

CLOUD & DATA PLATFORM
Microsoft Azure · **Azure Data Factory** · **Databricks** · **Delta Lake** · Lakehouse architecture · Snowflake · DuckDB

DATA ENGINEERING & ELT
Python · **SQL** · **PySpark** · **dbt** · Ingestion and transformation pipelines · ETL/ELT · Talend · Heterogeneous sources

ANALYTICS & BI
Power BI (DAX) · **Tableau** · **SAP BusinessObjects** · Qlik · Dataiku · Semantic models · Dimensional modeling (star, snowflake) · KPI

QUALITY & GOVERNANCE
Data quality rules · Integrity controls · Reliable data flows · Documentation and traceability · Access management

AI & AUTOMATION
RAG · LangChain · LLMs & AI agents · OpenAI / Anthropic API · Answer quality evaluation · Workflow automation

DEVOPS & TOOLS
Git & GitHub · **CI/CD (GitHub Actions)** · REST APIs · Postman · Jira · Confluence · VS Code · Agile / Scrum

PROFESSIONAL EXPERIENCE

EssilorLuxottica – Créteil (France) & Bangkok | Global group, 190,000 employees | Apprenticeship | Oct. 2022 – Oct. 2025

Data Engineer · Data Analyst · BI Business Analyst

Scope: ERP, sales, inventory and supply chain data across 3 regions (Europe, US, Asia). Data team of about fifteen people at headquarters, working daily with the teams in Thailand and the Philippines.

Data Platform & Data Engineering

- Deployed and administered the **Databricks (Azure)** platform processing **multi-source** data (ERP, sales, inventory, logistics) for the group's **3 regions**.
- Developed and automated **ETL pipelines in Python, SQL and PySpark**, orchestrated with **Azure Data Factory** and **Delta Lake**, ensuring reliable, high-performing data flows.
- Integrated developments with **Git and CI/CD** and wrote the pipelines' technical documentation, shortening onboarding for newcomers.

Analytics Engineering & Business Intelligence

- Designed and delivered **30 to 40 decision dashboards** on **4 BI tools** (Power BI, SAP BO, Qlik, Databricks) covering **3 business domains** (inventory, sales, supply chain) for management on **3 continents**.
- **Modeled data** (star and snowflake schemas) and built the **SAP BO semantic universes** used as the common foundation of group reports.
- Developed **DAX measures** and defined **steering KPIs** on group scopes (WW Service KPI, Forecast, S&OP, Weekly Sales Reporting) with management in Europe, US and Asia.
- **Optimised queries and reports**: computation time **cut by more than 65%** on critical reports, **9.2 s response time on 92% of queries** (target: under 10 s on 90%) and **availability above 99%**.

Data Quality & Governance

- Designed an **access and permissions monitoring dashboard** (read/write roles, non-compliant access detection, group change requests, related tickets), used by **about fifty people** from developers to management.
- **Automated the weekly consolidation** of this data, previously manual: about **4 hours a week freed** for the team.
- Implemented **data quality rules** and **integrity controls** upstream of deliverables, bringing the **data gap down to 0.8%** between the two platforms (target: under 2%).
- Documented flows and reports to ensure **traceability** and user team autonomy.

Business Analysis

- **Gathered, formalised and challenged business requirements** with European departments, then wrote the functional specifications used for development.
- Contributed to the group-wide **BI migration from Qlik to SAP BusinessObjects**: impact analysis, coordination with technical teams and **97% of UAT passed** with no blocking defect (target: 95%), **100% of milestones** met.
- **Trained and supported users**: **60 end users** and **15 key users** trained in French and English across **3 regions**, reaching **82% active users** after three months (target: 80%).
- Acted as the **interface between business and IT teams** across 3 continents on the group inventory optimisation project.

Artificial intelligence

- Designed and deployed to production an **internal RAG chatbot** (LangChain, embeddings, vector store): **30% of information search time saved**. First rolled out to a **12-person pilot team**, then extended to **the whole support team**.
- Built the **AI pipelines** (ingestion, cleaning, chunking, vector indexing) and **benchmarked several LLMs** with business question sets to evaluate answer quality.

Airloop La Plage – Geneva | Head waiter (chef de rang) | **June 2026 – ongoing**

Service coordination and client relations at peak times, alongside my search for a data role in French-speaking Switzerland.

Planzer – Geneva | Logistics & transport, Swiss leader | **2026 – ongoing**

Operational supply chain role: flow management in a demanding, high-tempo environment.

ENGINEERING PROJECTS (CESI, 2021 – 2025)

- **AI applied to healthcare**: model predicting cancer recurrence risk from patient data (preparation, anonymisation, model comparison).
- **Hospital Big Data**: ETL chain, data warehouse and BI reporting on heterogeneous sources for a hospital group.
- **Advanced algorithmics**: delivery route optimisation (operations research, metaheuristics).
- **Cybersecurity, systems and networks**: post-incident analysis, penetration testing, integration and compliance of multi-site IS.

OPEN-SOURCE DATA & AI PROJECTS

Code, documentation and live demos: github.com/Toumil94

- **Swiss watch exports, Tableau dashboards** (public.tableau.com/app/profile/toumi.lyes): 3 dashboards on official customs data (2012 – 2025): **KPIs recalculated by year** (parameter, LOD calculations), focus on the **automatic mechanical watch**, world map, executive memo.
- **Swiss hotel tourism BI analysis** (github.com/Toumil94/analyse-bi-suisse): end-to-end BI project on official Swiss statistics (API, 400,000 rows): requirements, KPI dictionary, tested **star schema**, 4-page **Power BI** report with **24 DAX measures** stored as PBIP and validated in CI, UAT and an **executive memo with recommendations**.
- **RAG assistant for newcomers to Switzerland** (assistant-suisse.netlify.app): sourced answers on permits, health insurance or taxes from **official sources**: hybrid retrieval (BM25, query rewrites, RRF fusion), **free LLM** with extractive fallback, **40-question evaluation set** and automated tests.
- **Swiss rail punctuality (SBB/CFF)** (cff-ponctualite.netlify.app): **automated daily pipeline** (GitHub Actions) on Swiss transport open data: **DuckDB and dbt** with data tests, Parquet data lake and a **public dashboard** refreshed every morning.
- **Job Hunter** (github.com/Toumil94/job-hunter-ai): **AI agent** that collects Data and AI job offers in Switzerland, scores them against my profile and drafts tailored applications (Python, LLM, GitHub Actions).

EDUCATION

Engineering degree in Computer Science, Data & AI specialisation — **2021 – 2025**
CESI Graduate School of Engineering – Lyon | CTI-accredited – MSc equivalent (Bac+5)
Project-based learning: data, AI, databases, networks, cybersecurity and project management.

1st year BSc, Mathematics — **2019 – 2020**
Université Côte d'Azur Valrose – Nice, France

CERTIFICATIONS & LANGUAGES

- ✓ Azure Data Fundamentals (DP-900)
- ✓ Generative AI Fundamentals – Databricks
- ✓ Cisco CCNA – Networking
- ✓ French – Native · English – Fluent (B2) · Spanish – Intermediate (B1)
- ✓ Databricks Lakehouse Fundamentals
- ✓ AI Agent Fundamentals – Databricks
- ✓ TOEIC – 840/990 (B2)
